Mini-Batch Gradient Descent

LATEST SUBMISSION GRADE

100%

1. You have 100 samples of data and your batch size is 25. How many iterations will it take to go through 1 epoch?   **1 / 1 point**

    > 4

    ✓ **Correct**
    correct

2. Consider the dataset class *Data()*. How would you create a data loader object trainloader with a batch size of 3?   **1 / 1 point**

    ⦿
    ```
    1  data_set=Data()
    2
    3  trainloader=DataLoader(dataset=data_set,batch_size=3)
    ```

    ◯
    ```
    1  data_set=Data(batch_size=3)
    2
    3  trainloader=DataLoader(dataset=data_set)
    ```

    ✓ **Correct**
    correct
